

Mini Pro Cotton Candy Robot

MODEL VMP

Cotton Candy VMP

Cotton Candy VMP (Mini Pro) is a semi-automatic countertop machine created to make selling cotton candy **simple, clean, and accessible anywhere**—not only at festivals or special events.

The machine automatically releases a stick. Once the customer inserts the stick into the robotic arm, the process starts automatically and the magic begins. No skills, training, or manual preparation are required beyond inserting the stick, making it ideal for fast-paced retail and food locations.

VMP (Mini Pro) produces a perfectly rounded cotton candy with up to three precise layers stacked on top of each other. Each serving is made using a choice of four sugar colors, allowing colorful combinations that attract attention, enhance the experience, and increase impulse purchases. Built-in safety systems ensure reliable and secure daily operation.

Everyday Cotton Candy

Designed to bring cotton candy into everyday retail spaces, not only festivals or special events. The machine helps transform ordinary locations into engaging, high-traffic points that naturally attract attention.

Compact & Countertop

A compact, countertop-sized solution that fits easily into almost any store or food environment. Its small footprint makes it ideal for cafés, malls, kiosks, and fast-paced retail spaces where space matters.

Smart Semi-Automation

A semi-automatic machine with a fully automated cotton candy production process. Operation is simple and intuitive, delivering consistent results with minimal effort or staff involvement.

Color, Shape & Sales

Creates perfectly rounded cotton candy with up to three precisely layered colors per serving. The visually striking result enhances the customer experience and increases impulse-purchase potential.
