The Keys

Customer Wins this key in a capsule crane. Each key is numbered to a corresponding door 1,2,3,4,5. Whatever key they win, accesses the prize. Once the player opens the door, the key is locked in place and cannot be removed without an operator key.

This is the operator key. It is inserted into the key gap and allows the key to be removed. An operator will replace the missing prize and remove this key. The operator will place the key again into a capsule to be won again.
