2.5 amps @ 230 vac

Axe Master takes the sport of axe throwing, as it skyrockets in popularity across the world, to the next level.

Players toss rubberized "real feel" axes at a physical target in this multi-player, multi-game experience.

Make a statement in any game room, without a big hassle. Its two sections — the safety wall and back cabinet remain under 5' wide.

Axe Master has been designed for effortless upkeep. The entire back cabinet is on wheels, making it easy to maneuver for setup.

Many will try, few will become — the true Axe Master.
