HOW TO PLAY

- The game is easy to understand and requires only a single push button to play
- Player drops small white balls from the top of a vertical pegboard. As the balls travel down, tickets and rewards are collected if the balls pass through certain slots
- The game also drops large "Emoji balls" which are equipped with RFID chips. (To win the BONUS, a player must collect all 6 Emoji balls)
- Player can also trigger the Prize Wheel or earn "Emoji Balls" if a ball falls into corresponding holes:

- Objective is similar to that of a coin pusher: try to get the balls to fall over the ledge and into the spill tray below to win tickets
