

AUGMENTED REALITY DARTS

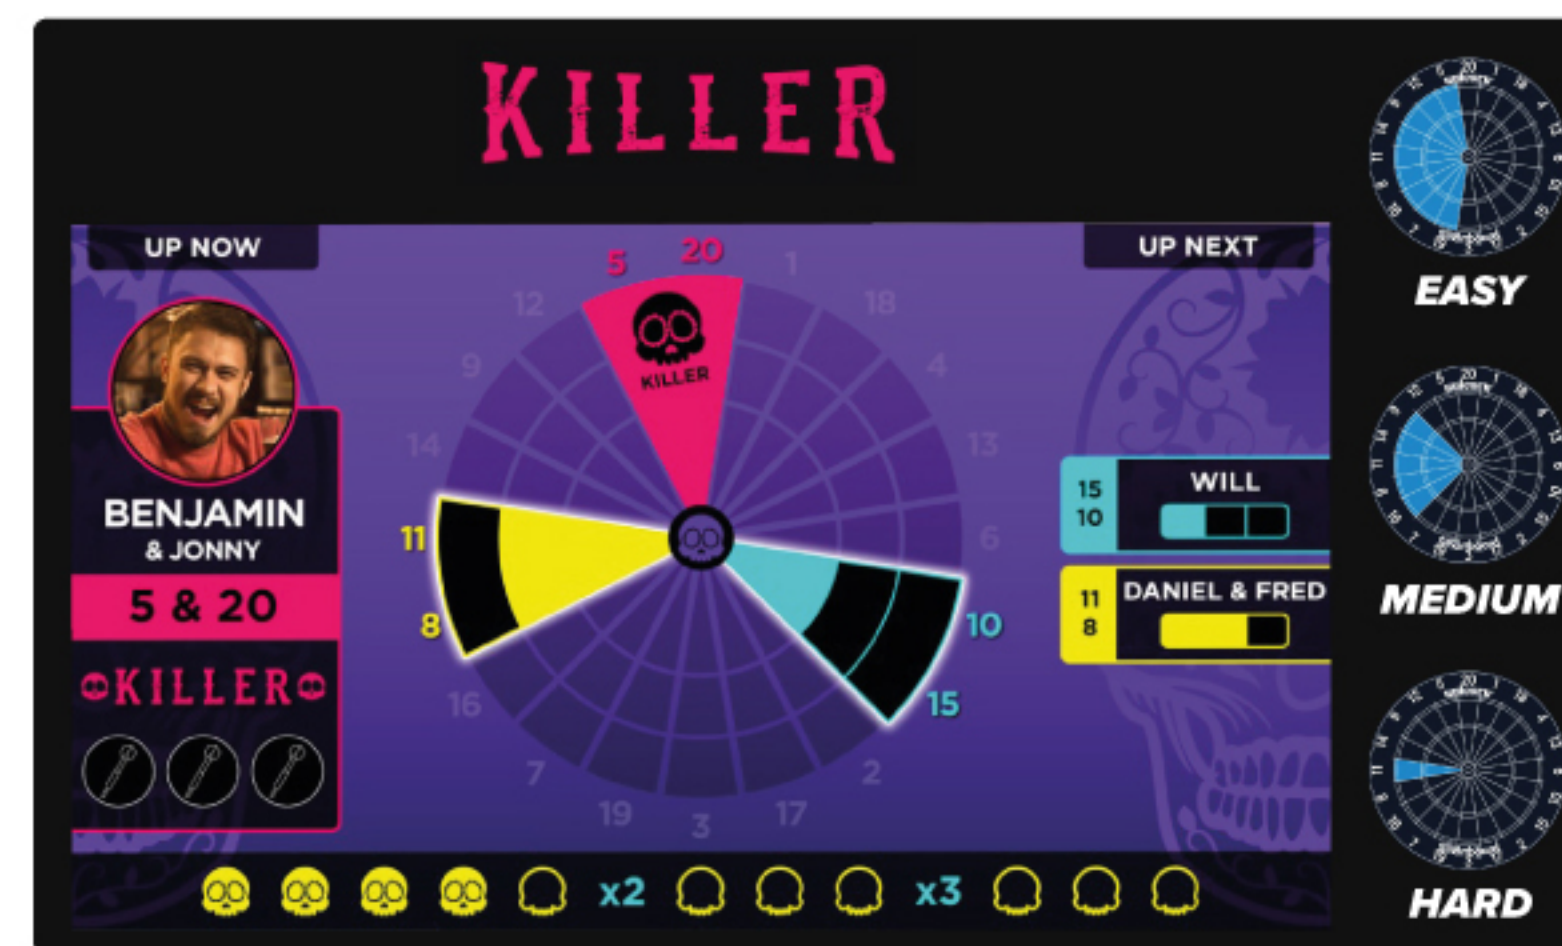

A NEW ERA IN SOCIALLY COMPETITIVE DARTS

Augmented Reality takes interactive darts to the next level! Using a plain white dartboard, the game-play graphics are superimposed over the board and surrounding area with an ultra-bright, laser projector. The game-play targets appear on the board, and score animations occur instantly at the point of impact. All of this is accompanied by an array of captivating sound effects, making it the most immersive darts experience!

Everything is controlled via the intuitive touch-screen user interface and scores are auto-calculated making this a highly accessible game for players of all ages and a must-have social entertainment product!

Players play with real, steel tip darts and real bristle dartboards from the world's leading manufacturer, Unicorn.

GAMES

Perfect for players of all skill levels!
