

INSTRUCTIONS ON CHANGING TWO SPEED ECM EVAPORATOR FAN MOTOR TO ONE SPEED

- REFER TO ATTACHED WIRING DIAGRAM FOR YOUR UNIT.
 - ***NOTE – ECM MOTORS WILL HAVE 3 WIRES
 - ✓ **BLUE – NEUTRAL**
 - ✓ **BROWN – LINE**
 - ✓ **BLACK – OUTPUT OF TEMP CONTROL ON A CALL FOR COOLING**
- IN ORDER TO ALLOW THE UNIT TO OPERATE AT ONE CONTINUOUS, YOU WILL NEED TO ISOLATE THE BLACK WIRE AND MARRETE IT OFF. THIS INVOLVES DISCONNECTING IT FROM IT'S CURRENT WIRING (WIRED IN CONNECTION WITH THE COMPRESSOR AND CONDENSER FAN MOTOR ON A CALL FOR COOLING).
